

Moulded PVC Boss Connectors

Aymroo boss connectors allow for installing a branch into an existing line without the need for cutting in a full junction, saving material and installation costs. Injection moulded PVC construction ensures quality and compatibility with existing PVC systems.

Aymroo's team have introduced innovative features to make installation of our moulded PVC saddles a much easier operation:

- The sealant channel aids the installer in ensuring the correct amount of sealant is applied to create an adequate seal.
- The "Quick Strap System" does away with tricky buckles or straps, which aids the saddles to be installed in just minutes.
- Cutting template supplied for accurate and speedy marking of required cut out.

Available in a wide range of sizes to suit

- 150mmX100mmX45°
- 225mmX100mmX45°
- 225mmX150mmX45°
- 300mmX100mmX45°
- 300mmX150mmX45°
- 375mmX100mmX45°
- 375mmX150mmX45°

Can be made to suit a wide range of FRC pipe.
